have discovered, and Mathematics is the language of choice here. The rise of the Physical Sciences and the Engineering that rests upon it has benefited from, and contributed to, the Mathematics that we now have. And practical people wouldn't buy the stuff if it didn't work. Well, exactly the same factors make Mathematics useful to other people too.

Course Objectives. Courses in mathematical modeling should typically strive to: 1. introduce students to the elements of the mathematical modeling process; 2. present application-driven mathematics motivated by problems from within and outside mathematics; 3. exemplify the value of mathematics in problem solving; and 4.
