The Effect of Assistive Technology on Educational Costs: Two Case Studies Amy Gips, Philip A. DiMattia, James Gips Presented at The International Conference on Computers Helping People with Special Needs (ICCHP 2004) Paris, July 2004 Published in Computers Helping People with Special Needs

The International Conference on Computers Helping People

ers of knowledge, the computer is the tool with the potential to help in reaching these goals. For a de-tailed description of different modes of computer use in the educational environment, see Alessi and Trollip (1991) or Venezky and Osin (1991). In the framework of this Technical Note, the following modes and benefits are summarized briefly.

Computers in Education in Developing Countries: Why and How?

â€¢ Computers can be used to support personal interests and social life. â€¢ Computers can help young people communicate with mentors. â€¢ Increasing numbers of jobs require computer skills. Below is specific advice from successful teens and adults with disabilities about encouraging young people with disabilities to use computers. â€¢ The Internet is a valuable tool.

Chapter NiNe - University of Washington

example, that computers cost more than they actually do. Another is breaking equipment or doing something wrong. A third is security: although most older people donâ€™t know enough about technology to be familiar with common security problems, many know ... to help older people renew or develop.

the potential of technology to help older people renew or

With the development of digital and wireless technologies, more and more devices are becoming available to help people with hearing, voice, speech, and language disorders communicate more meaningfully and participate more fully in their daily lives.
