Design with Constructal Theory starts with basic principles and then shows how these principles are applied to understanding and designing increasingly complex systems. Problems and exercises at the end of each chapter give you an opportunity to use constructal theory to solve actual design problems.

The first comparison is with constructal theory, a set of ideas and models recently developed to explain how "design" arises in both biotic and abiotic systems. Both traditions emphasize the importance of flow and motion and how these generate connections, not only within biotic systems, but also between biotic and abiotic phenomena.
