Fishing is the activity of trying to catch fish. Fish are normally caught in the wild. Techniques for catching fish include hand gathering, spearing, netting, angling and trapping.. "Fishing" may include catching aquatic animals other than fish, such as molluscs, cephalopods, crustaceans, and echinoderms. The term is not normally applied to catching farmed fish, or to aquatic mammals, such ...

Aquaponics consists of two main parts, with the aquaculture part for raising aquatic animals and the hydroponics part for growing plants. Aquatic effluents, resulting from uneaten feed or raising animals like fish, accumulate in water due to the closed-system recirculation of most aquaculture systems.

*The ma'sala of Ayatullah Sistani says that a halal fish is one which essentially has scales even if it loses them because of a secondary/external (bil 'aridh) factor.. However, since the fish in question (Hoki) does not lose its scales because of a secondary/external factor rather it loses them as a natural process -- it would be better to exercise precaution and not include this fish in the ...

DO NOT vent or "fizz" rockfish! Venting or "fizzing" involves puncturing the stomach protruding from the fish's mouth, or puncturing the fish's body to let air out of the swim bladder.

Rockfish Conservation and Deepwater Release, Alaska

Many marine fish have gas-filled organs called swim bladders. These organs control buoyancy and allow the fish to maintain depth. When some fish are brought quickly to the surface, the gas in the swim bladder can over-expand and rupture the bladder, a condition known as "barotrauma." Escaping gas fills the gut cavity which can lead to everted stomachs or intestines.
