Introduction. Rice, which is both a model plant and one that feeds more than half of the world's population (Sasaki and Burr, 2000), evolved in tropical and subtropical areas and is sensitive to chilling stress (Kovach et al., 2007, Saito et al., 2001, Sang and Ge, 2007). Extreme temperature thus represents a key factor limiting global rice plant distribution.

COLD1 Confers Chilling Tolerance in Rice - ScienceDirect

Siraitia grosvenorii (luo han guo or monk fruit) is a herbaceous perennial vine of the Cucurbitaceae family, native to southern China and northern Thailand. The plant is cultivated for its fruit, whose extract is nearly 300 times sweeter than sugar and has been used in China as a low-calorie sweetener for cooling drinks and in traditional Chinese medicine.

Siraitia grosvenorii - Wikipedia

Generally, the dendrite formation over lithium anode has a close relationship to the locally enhanced electric field as illustrated Fig. 1a. In the wake of initial planting, electrons from the external circuit tend to accumulate at the vicinity of the hot spots created by newly exposed lithium depositions.

PMMA-assisted Li deposition towards 3D continuous dendrite

Club career Liaoning FC. Li Tie began his football career at the age of fifteen, joining Liaoning FC's youth academy system in 1992. The following year he was sent to Brazil for a five-year training programme sponsored by Jianlibao and became the captain of the newly organized youth football team. Li started his professional career by playing for Liaoning FC and rose to prominence during the ...
