Aspirin (2nd edition) Compiled by David Lewis Edited by Colin Osborne and Maria Pack Designed by Imogen Bertin and Sara Roberts First published by the Royal Society of Chemistry in 1998

Aspirin - The Royal Society of Chemistry

A mnemonic is a memory aid used to improve long term memory and make the process of consolidation easier. Many chemistry aspects, rules, names of compounds, sequences of elements, their reactivity, etc., can be easily and efficiently memorized with the help of mnemonics.

List of chemistry mnemonics - Wikipedia

This site provides annotated Web links to instructional materials and other resources of interest to Chemistry teachers and course designers. The links are carefully selected to represent what this author considers to be the most useful and exemplary Web-accessible resources that others can draw upon for ideas and materials.

Polycarbonates (PC) are a group of thermoplastic polymers containing carbonate groups in their chemical structures. Polycarbonates used in engineering are strong, tough materials, and some grades are optically transparent. They are easily worked, molded, and thermoformed. Because of these properties, polycarbonates find many applications.

Polycarbonate - Wikipedia

This book was an important part of my life starting from age 11, when my parents gave it to me as a birthday present. With my father's help, I found a supplier for all of the glassware, rubber stoppers, rubber tubing, and other lab gear.

Golden Book of Chemistry Experiments: Robert Brent

Baggie Science This activity introduces students to the idea of chemical reactions by having them mix chemicals inside zip-lock baggies. Although this activity was designed for younger students, it can be used as is or modified for high school students.

The Catalyst: Chemistry Experiments and Demonstrations

SODIUM CHLORATE is an odorless pale yellow to white crystalline solid. It is appreciably soluble in water and heavier, so may be expected to sink and dissolve at a rapid rate. Although it is not itself flammable, the solid product and even 30% solutions in water are powerful oxidizing agents. Contact with wood, organic matter, ammonium salts, sulfur, sulfuric acid, various metals, and other ...
