

pattern recognition theory and pdf

Pattern recognition is the automated recognition of patterns and regularities in data. Pattern recognition is closely related to artificial intelligence and machine learning, together with applications such as data mining and knowledge discovery in databases (KDD), and is often used interchangeably with these terms. However, these are distinguished: machine learning is one approach to pattern ...

Pattern recognition - Wikipedia

Theories Template matching. Template matching theory describes the most basic approach to human pattern recognition. It is a theory that assumes every perceived object is stored as a "template" into long-term memory. Incoming information is compared to these templates to find an exact match. In other words, all sensory input is compared to multiple representations of an object to form one ...

Chapter 4 FACE RECOGNITION AND ITS APPLICATIONS Andrew W. Senior and Ruud M. Bolle IBM T.J. Watson Research Center, P.O. Box 704, Yorktown Heights, NY 10598, USA.

Chapter 4 FACE RECOGNITION AND ITS APPLICATIONS

Abstract. The tutorial starts with an overview of the concepts of VC dimension and structural risk minimization. We then describe linear Support Vector Machines (SVMs) for separable and non-separable data, working through a non-trivial example in detail.

EHP March 2008 draft4 - Self-Determination Theory

Fig. 1 shows a confusion matrix and equations of several common metrics that can be calculated from it. The numbers along the major diagonal represent the correct decisions made, and the numbers of this diagonal represent the errors—the confusion—between the various classes.
