Sickle Cell Pain Crisis Drug seeking behaviour in emergency management of sickle cell disease. The majority of Sickle Cell Disease patients suffer real pain, but may not look uncomfortable because they have learned to adapt to a lifetime of chronic pain. In the ED, they may appear calm, preoccupied with their handheld device or casually chatting.

A migraine is a primary headache disorder characterized by recurrent headaches that are moderate to severe. Typically, the headaches affect one half of the head, are pulsating in nature, and last from two to 72 hours. Associated symptoms may include nausea, vomiting, and sensitivity to light, sound, or smell. The pain is generally made worse by physical activity.
