Department of Psychological Sciences < Case Western

Speech is human vocal communication using language. Each language uses phonetic combinations of a limited set of perfectly articulated and individualized vowel and consonant sounds that form the sound of its words (that is, all English words sound different from all French words, even if they are the same word, e.g., "role" or "hotel"), and using those words in their semantic character as words ...

Speech - Wikipedia

A speech sound disorder (SSD) is a speech disorder in which some speech sounds (called phonemes) in a child's (or, sometimes, an adult's) language are either not produced, not produced correctly, or are not used correctly. The term protracted phonological development is sometimes preferred when describing children's speech to emphasize the continuing development while acknowledging the delay.

Controversies about risks to public health regularly hit the news, whether about food safety, environmental issues, medical interventions, or “lifestyle” risks such as drinking. To those trying to manage or regulate risks, public reactions sometimes seem bizarre. To the public, the behaviour of those supposedly “in charge” can seem no less odd.
