The fundamental theorem of poker, introduced by David Sklansky, states: Every time you play your hand the way you would if you could see your opponents' cards, you gain, and every time your opponents play their cards differently from the way they would play them if they could see your cards, you gain. This theorem is the foundation for many poker strategy topics.

Planning Poker relies on relative estimating, in which the item being estimated is compared to one or more previously estimated items. It is the ratio between items that is important. An item estimated as 10 units of work (generally, story points) is estimated to take twice as long to complete as an ...

The Best Way to Establish a Baseline When Playing Planning

Being "on tilt" The most common way to "tilt" is losing, often a recent victim of a bad beat, or being defeated in a particularly public and humiliating fashion.. For example: Folding to a large bet only to have your opponent turn over a poor hand (being shown a bluff).; Being bluffed by a small bet (a post oak bluff).; Having an opponent "suck out," or catch a miracle card late in the ...
