Many of you have probably heard of the "alkaline diet". There are a few different versions of the acid-alkaline theory circulating the internet, but the basic claim is that the foods we eat leave behind an "ash" after they are metabolized, and this ash can be acid or alkaline (alkaline meaning more basic on the pH scale).

This is really good. But I also think there's a reason our base cultural values are used as a tiebreaker they're designed to minimize the average actual distaste the average person has with the status quo (You can't have a cultural norm if too many people object to it too strongly, it ends up changing).
