- There's a 50% chance that the result of a coin flip will be heads. There's an 80% chance that the best basketball player on your team will make a free throw. There's a 75% chance that the unemployment rate in the United States will drop next year. Not only are these three probabilities about three very different events, these are also three different categories of ...

What is Bayes's theorem, and how can - Scientific American

Inductive reasoning is a method of reasoning in which the premises are viewed as supplying some evidence for the truth of the conclusion (in contrast to deductive reasoning and abductive reasoning). While the conclusion of a deductive argument is certain, the truth of the conclusion of an inductive argument may be probable, based upon the evidence given. ...

example, there are 2 samples that have a value of 110, 8 samples that have a value of 131, 0 samples that have a value of 170, etc. We will represent the histogram by H_i , where i is an index that runs from 0 to $M-1$, and M is the number of possible values that each sample can take on. For instance, H_{50} is the number of samples that have a value of 50.

The normality test is used to determine whether a data set resembles the normal distribution. If the data set can be modeled by the normal distribution, then statistical tests involving the normal distribution and t distribution such as Z test, t tests, F tests, and Chi-Square tests can be performed on the data set. There are a number of well-known normality tests such as Kolmogorov Smirnov Test ...

10/1/09 update "well, it's been nearly a year, and I should say not everything in this rant is totally true, and I certainly believe much less of it now. Current take: Statistics, not machine learning, is the real deal, but unfortunately suffers from bad marketing. On the other hand, to the extent that bad marketing includes misguided undergraduate curriculums, there's plenty of room to ...
