Crop Production

Production is a process of combining various material inputs and immaterial inputs (plans, know-how) in order to make something for consumption (the output). It is the act of creating output, a good or service which has value and contributes to the utility of individuals.. Economic well-being is created in a production process, meaning all economic activities that aim directly or indirectly to ...

OECD-FAO Agricultural Outlook 2015-2024

The 2000s commodities boom or the commodities super cycle was the rise, and fall, of many physical commodity prices (such as those of food, oil, metals, chemicals, fuels and the like) during the early 21st century (2000–2014), following the Great Commodities Depression of the 1980s and 1990s. The boom was largely due to the rising demand from emerging markets such as the BRIC countries ...
