There is a natural connection between particle physics and representation theory, as first noted in the 1930s by Eugene Wigner. It links the properties of elementary particles to the structure of Lie groups and Lie algebras. According to this connection, the different quantum states of an elementary particle give rise to an irreducible representation of the Poincaré group.

Notes taken in lectures: Hans-Jürgen Schneider: Hopfalgebren (German). Mirror: PDF (und Sourcecode). Mitschrift von Prof. Schneiders Vorlesungen über "Hopfalgebren und Quantengruppen" an der LMU München im WS 2008/2009 und im SS 2009. Das Skript ist gegen Ende des zweiten Semesters unvollständig, aber stellenweise von mir ergänzt.
