O CAPTAIN! my Captain! our fearful trip is done;  
The ship has weather'd every rack, the prize we sought is won;  
The port is near, the bells I hear, the people all exulting,  
While follow eyes the steady keel, the vessel grim and daring:  
But O heart! heart! heart! O the bleeding drops of red,  
Where on the deck my Captain lies,  
Fallen cold and dead.

This website provides you with information about the weather and climate in almost every country around the world. Two of the most important factors determining climate are temperature and precipitation. So we show the average rainfall, snowfall, hours of sunshine and the temperature of a region in graphs and/or charts.

### **Weather and Climate information for every country around**

A weather radar is used to locate precipitation, calculate its motion, estimate its type (rain, snow, hail, etc.), and forecast its future position and intensity. Modern weather radars are mostly doppler radars, capable of detecting the motion of rain droplets in addition to intensity of the precipitation.
