Recycling is the process of converting waste materials into new materials and objects. It is an alternative to "conventional" waste disposal that can save material and help lower greenhouse gas emissions. Recycling can prevent the waste of potentially useful materials and reduce the consumption of fresh raw materials, thereby reducing: energy usage, air pollution (from incineration), and water ...

Recycling - Wikipedia

Reuse is the action or practice of using something again, whether for its original purpose (conventional reuse) or to fulfil a different function (creative reuse or repurposing).It should be distinguished from recycling, which is the breaking down of used items to make raw materials for the manufacture of new products. Reuse â€” by taking, but not reprocessing, previously used items â€” helps ...
