

solid surfaces interfaces and pdf

Colloids and Surfaces B: Biointerfaces is an international journal devoted to fundamental and applied research on colloid and interfacial phenomena in relation to systems of biological origin, having particular relevance to the medical, pharmaceutical, biotechnological, food and cosmetic fields. Submissions that: (1) deal solely with biological phenomena and do not describe the physico ...

Wetting is the ability of a liquid to maintain contact with a solid surface, resulting from intermolecular interactions when the two are brought together. The degree of wetting (wettability) is determined by a force balance between adhesive and cohesive forces. Wetting deals with the three phases of materials: gas, liquid, and solid.

Many surfaces considered in physics and chemistry (physical sciences in general) are interfaces. For example, a surface may be the idealized limit between two fluids (the surface of the sea) or the idealized boundary of a solid (the surface of a ball). In fluid dynamics, the shape of a surface may be defined by surface tension. However, they are surfaces only at macroscopic scale.

§4. The P²G²D family of associate. minimal surfaces. Schwarz's P and D surfaces and their associate surface G (the gyroid) are the topologically simplest examples of embedded TPMS that have cubic lattice symmetry. They are related by the continuous bending transformation described in 1853 by Ossian Bonnet. The mean curvature (which is zero at every point), the Gaussian curvature, and the ...

The development of visible-light-mediated allylation of unactivated sp³ C-H bonds is reported. The remote allylation was directed by the amidyl radical, which was generated by photocatalytic fragmentation of a pre-functionalized amide precursor.

Angewandte Chemie International Edition: Early View

1.1 Geometry: geometrical entity definition. Gmsh uses a boundary representation (BRep) to describe geometries. Models are created in a bottom-up flow by successively defining points, oriented curves (line segments, circles, ellipses, splines, etc.), oriented surfaces (plane surfaces, surfaces, triangulated surfaces, etc.) and volumes.
