Moral Development focuses on the emergence, change, and understanding of morality from infancy through adulthood. Morality develops across a lifetime and is influenced by an individual's experiences and their behavior when faced with moral issues through different periods' physical and cognitive development.

The interpersonal-intergroup continuum. Social identity theory states that social behavior will vary along a continuum between interpersonal behavior and intergroup behaviour. Completely interpersonal behaviour would be behaviour determined solely by the individual characteristics and interpersonal relationships that exists between only two people.

Our review of the literature on power in teams suggests that power can have deleterious consequences for

team outcomes. Here we develop an emergent conflict account of power in which we explain why and when power can corrode team outcomes (for an overview of our theoretical model, please see Fig. 1). In this theory, we focus on the two most commonly examined conceptualizations of power at the ...
